Mood Acoustic

mood®

New from Mood - Acoustic Pictures!

Mood has created brand new possibilities to use acoustic picture elements in interior design. The concept is Mood Acoustic, a tightly stretched textile image on an aluminium frame containing Ecophon® acoustic panels!

- optional images
- also large scale
- seamless images
- images are easy to exchange
- high quality print
- easy transportation

The textile image is made using sublimation technique and it stretches over the assembled frame very tightly, which ensures that the image does not stretch even with large sizes and it can stand the test of time. The picture is fixed to the groove on the edge of the frame with a silicone string and can be replaced quickly and easily.

Mood Acoustic pictures are always custom made. They can be installed on a wall, fixed to the ceiling or you can make them into double-sided space dividers. Textile quality used with the pictures meets the fire security requirements (B1) for public use.

Frame profiles are available in a number of different models and depths (20 - 180 mm). The base colour is anodised silver (aluminium). Frames can also be painted with colours from the RAL colour space system.

In addition to the art works in the Mood Image collection, Mood can assist in sourcing image materials or they can be from client. Besides to image and text motifs, you can also choose from single-colour surfaces or patterns. The print colour system is CMYK with print resolution up to 1080 dpi.

Mood Acoustic with Ecophon® acoustic plates are tried and tested in Finland with excellent results. Tests results are available in PDF format (Turku Occupational Health Institute, 2008). For Mood Acoustic solutions can be chosen acoustic plates with different sound absorption qualities. Chosen element type specifies an absorption class (A-E) that effects to the space acoustic.

Setting the Mood

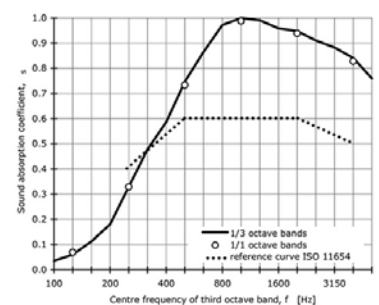

Latest techniques and solutions can be found from Mood's versatile product line to create different art works. Mood is working with the Europe's leading and most innovative suppliers. Many Mood Concepts have been developed to be used in public as well as in private settings. We are pleased to give more information about Mood image concepts and other services. Additional information and collections are on www.mood.fi.
